

She has
the kids
create
art.

She has the
kids put the
art on a
drying rack
for
collection.

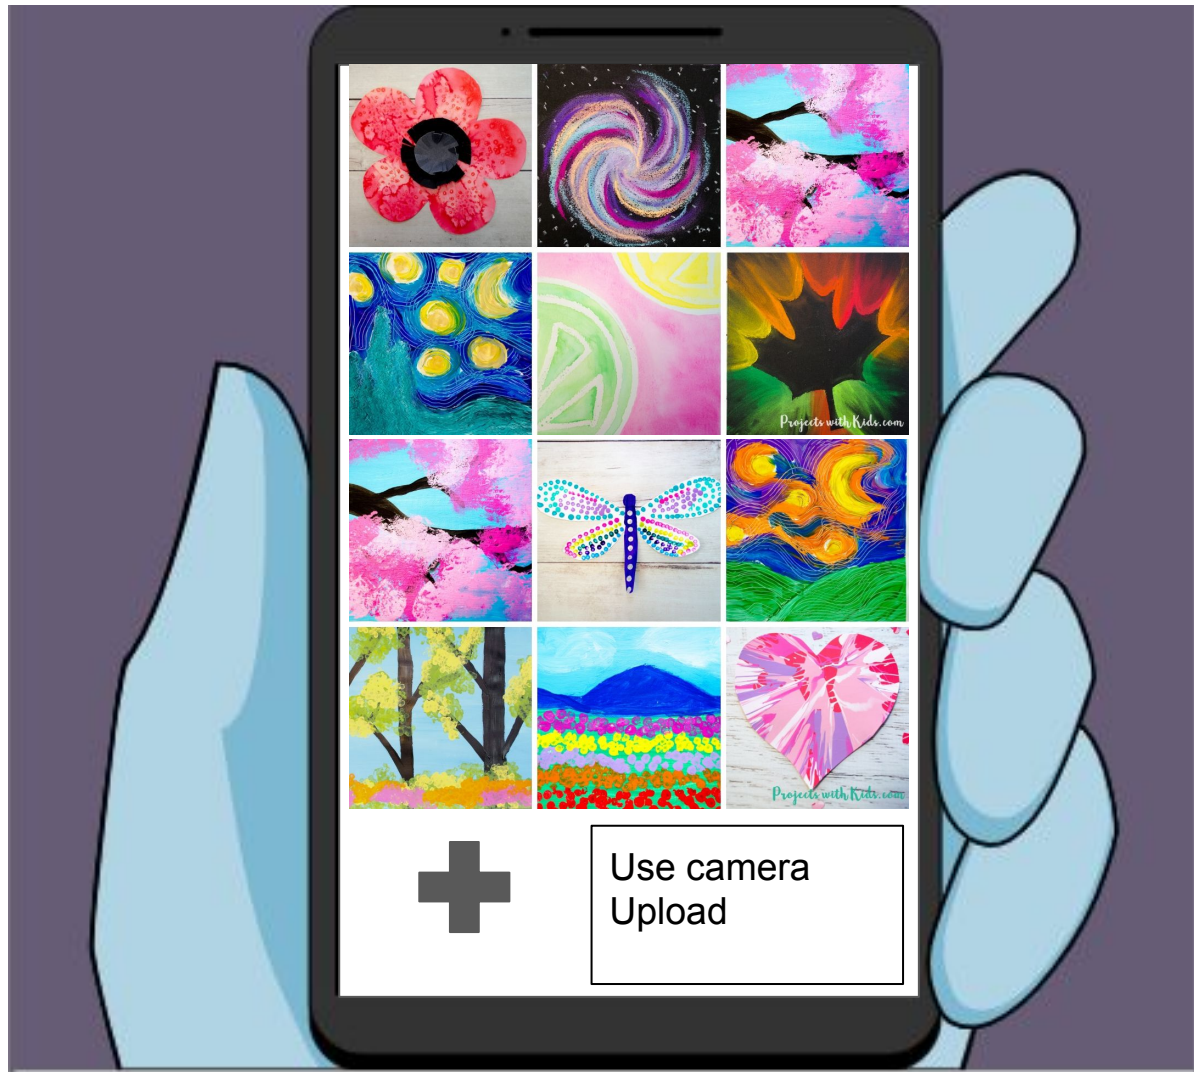

She creates a new folder on the app and presses the plus sign.

She takes
pictures of the
kids art.

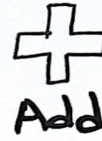

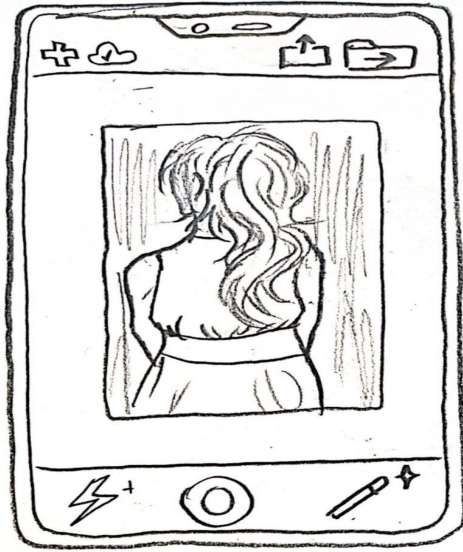

The kids art is sorted on her phone.

CS Scanned with CamScanner

Andrew is at the beginning of his 5th semester. His big assignment for the end of the semester is to have a detailed portfolio of all of his assignments throughout this semester in a digital presentation. However, with a majority of his pieces and artworks being on his laptop, and digitally drawn, organization can be tricky.

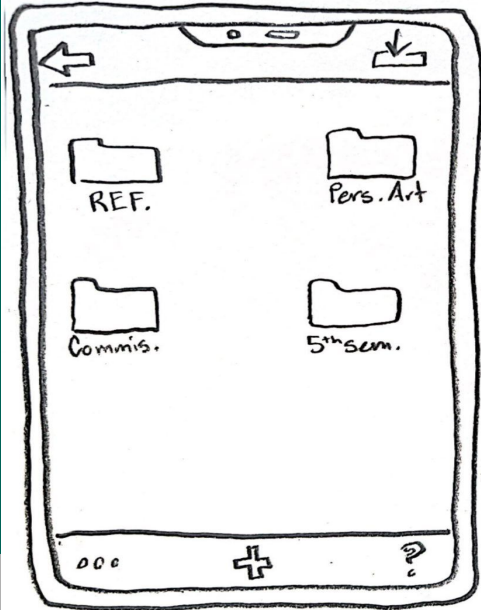

CS Scanned with CamScanner

Throughout the semester, Andrew uses the user friendly interface to not only capture his physical and digital artworks, but readily saves them to a folder of his choosing on the app, can edit the image, share, and add another capture.

CS Scanned with CamScanner

After creating his “5th Semester” folder, Andrew continues to save all of his artworks on the app and store it in an easy to use manner.
